

I am a Hoosier, a citizen of the State of Indiana, and I am extraordinarily satisfied with the effectiveness my State's current Do Not Call Law. I do not in any way see how any organization should have the right to activate an electronic device (telephone) in my home, not necessarily with out my permission, but against my express will as represented by this Do Not Call Law. Proceeding 02-278 would allow a more lenient federal law to preempt the state law which I have personally chosen to be protected under, and whose founder I have personally voted to reelect. I have CHOSEN to not receive calls soliciting my purchasing of or participating in commercial programs and items, and I strongly disagree with anything which preempts my personal choice of privacy in favor of the potential commercial gain of others.
